## MOST COMMONLY ASKED QUESTIONS

DUE TO THE MANY DIFFERENT PIPE CONFIGURATIONS JABO SUPPLY WILL NEED TO KNOW THE FOLLOWING INFORMATION WHEN ORDERING PIPE.

### **1. (QUESTION) TYPE OF STEEL PIPE?**

1. CARBON STEEL?
2. GALVANIZED?
3. STAINLESS STEEL?

### **2. (QUESTION) WHAT SCHEDULE ? (REF TO PIPE CHART FOR DIFFERENT SCH**

Pipe schedule (SCH) is **how the wall thickness of a pipe is described**. It is not an actual measurement, but a guide number based on a wall thickness formula. Two pipes of the same diameter may have different schedules, which means they have a different wall thickness. **THE GREATER THE SCH THE THICKER THE PIPE**

**PLEASE LET YOUR CSR KNOW  
WHEN ORDERING IF AN MTR IS  
REQUIRED.**

### **3. (QUESTION) WHAT TYPE OF END CONNECTION? (See next page for pictures of each)**

**HOW WILL THE PIPE BE ASSEMBLED? (See next page for pictures of each)**

1. **Plain End (PE)** - Uses weld fittings (butt weld or socket weld fittings)
  - \*Socket weld is typically used for smaller diameter pipe.
  - \*Butt weld is typically used for larger diameter (4" and up).
2. **Threaded & Coupled (T&C)** - Uses malleable steel or forged steel fittings.
3. **Flanged**- Uses flanges to connect pipe.
4. **Grooved Connections**- The pipe groove is made by forming or machining an actual groove into the end of two pipes. A coupling is required to join the pipe.

### **4. (QUESTION) HOW IS IT MANUFACTURED?**

#### **A. ASTM A53**

(ERW) Electric Resistance Welding pipe is manufactured by rolling metal and then welding it longitudinally across its length.

(CW) Continuous Weld-Pipe that is produced with a continuous weld, typically small diameter pipe . The steel is formed into the pipe shape while hot, then the edges are fused or welded together. CW simply means that the laser remains on continuously until stopped.

#### **B. ASTM A106 SEAMLESS**

Seamless pipe is commonly used in the construction of oil and gas refineries, power plants, petrochemical plants, boilers, and ships where the piping must transport fluids and gases that exhibit higher temperatures and pressure levels.

**Generally, seamless is used for applications that demand high pressure and ERW is utilized for the services of low to medium pressure**

**MOST COMMONLY ASKED QUESTIONS**

**5. (QUESTION) IS A MTR REQUIRED WITH THE DELIVERY OF THE PIPE ?**

A material test report (MTR), sometimes called a mill/manufacturer test report, is a certified record of a steel product’s physical and chemical properties and in some cases, raw material origins. These properties are measured against standards set up by the American National Standards Institute (ANSI) or the American Society of Mechanical Engineers (ASME), in order to control and ensure quality. An MTR ensures proper compliance with these standards, and presents the buyer with documentary proof of that compliance.

**MTR MUST BE REQUESTED AT THE TIME OF ORDER.**

*\*NORMALLY THE MINING INDUSTRY DOES NOT REQUIRE MTR.*

**HOW TO ORDER STEEL PIPE**

HOW TO ORDER STEEL PIPE						
1. Provide Jabo Part number to your Jabo CSR						
2. Provide the below information to your Jabo CSR

Galvanized pipe is **steel pipe that has been cleaned with acid and dipped in a molten zinc bath**. Galvanized pipe is used in applications where the system is required to be resistant to rust and corrosion. Galvanized pipe is known for it's longevity, affordability, availability, and ease of use.

SQUARE HEAD COUNTER SUNK PLUGS	<p>Galvanized pipe fittings are used for countless outdoor and industrial applications because of the material's ability to protect against corrosion and salt. Galvanized pipe and fittings may be used in most applications with the exception of underground lines. While they work best with cold water lines, they may be used with hot water as well. The main advantage of using galvanized fittings is their superior rust resistance when compared to black and copper fittings. Galvanized pipe fittings should not be used with gas applications.</p>		
			

MOST COMMONLY ASKED QUESTIONS

**TYPES OF MATERIAL**

- 1. Black Malleable
- 2. Galvanized Malleable

**TYPE OF CONNECTION**

- 1. Threaded Only

\*Malleable iron pipe fittings are not suitable for welding
